Finding Our Way

Keep going · Teens & adults

Verse 1

Everyone’s walking like they know the way,
Phones in their hands, eyes straight ahead.
Someone’s always louder, someone’s always late,
Someone looks like they already won the day.

You check the clock, then check your face,
Wonder if you missed some kind of race.
But no one handed out a map—
They just started walking and didn’t look back.

Chorus

We move fast, we move slow,
Some take off, some stay low.
Different streets, same town,
Different moments coming around.

Verse 2

Some people talk like they’re already there,
Like confidence is something you wear.
Some people try things ten times wrong,
Some disappear and come back strong.

It looks messy up close,
It always does.
But growing’s not clean,
And neither is love.

Chorus

We move fast, we move slow,
Some take off, some stay low.
Different streets, same town,
Different moments coming around.

Bridge

No one’s ahead of you.
They’re just somewhere else.
No one’s behind you either.
You’re exactly where you fell.

Final Chorus

We move fast, we move slow,
Some take off, some stay low.
Different streets, same town,
Different moments coming around.

Outro

Somewhere else…
Is still part of the way.
